

GREEN MOUNTAIN WINDOW CO.

Beauty, talent and flexibility have opened up a lot of doors for us.

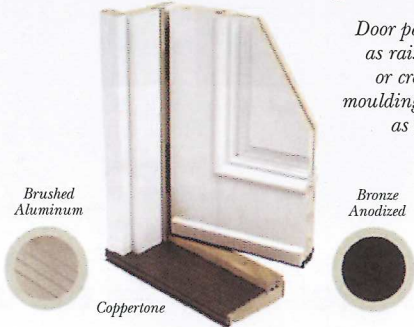

Entrances make important statements about you and your home. Our ability to create beautiful, custom-designed, solid wood door entrance systems lets you say "welcome" with a true sense of individuality and style. And, our enhanced weather proofing and security features let you say "not welcome" to harsh weather and intruders with authority. You can choose from a wide variety of designs or you can design your own custom

entry. Like our windows, our entrances and sidelites offer an extensive array of possibilities including: species of wood; door shapes and dimensions (curve tops, etc.); proportions of stiles and rails; sill types (bronze aluminum or solid hardwood; panel types (raised, flat, v-groove, cross-buck); raised mouldings; decorative grilles & glazing; hardware types and finishes; sliding or swinging screens; jamb depths.

You can choose your door panel, swing way, sill type and finish.

Door panels are available as raised, flat, v-groove or cross buck. Raised mouldings are also available as shown on left.

A Bronze Anodized sill with Oak crown is standard. Brushed Aluminum or Coppertone sills are optional.

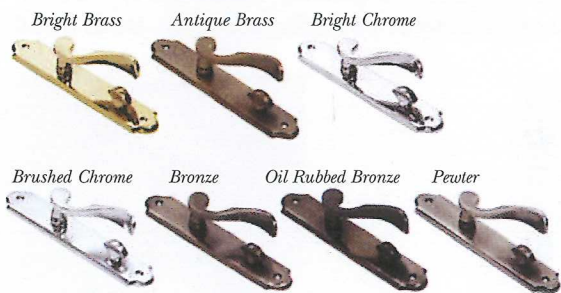

Solid Oak or Mahogany sills are also available, but only as inswing.

Low-profile sills are available in Bronze Anodized or Brushed Aluminum finish.

Our door hardware is available in a variety of attractive finishes
